To insert your Samsung Galaxy Note 8.0 into the Folio, start with the Folio's keyboard facing you. Then, with your Note 8.0 in landscape mode and the Home button on your right, set the bottom half of your Note 8.0 in the cover, making sure it is settled (you may need to apply light pressure to your Note 8.0 to ensure it is settled at the bottom of the cover).

Next, snap the top half into the cover. Check all corners to make sure they have seated properly as well.

When your Note 8.0 is secure in the Folio, you can close it, and cleverly placed magnets will activate your Note 8.0's sleep/wake feature to help preserve battery life. Simply open your Folio to wake your Note 8.0.

To easily remove your Note 8.0, simply grasp the top of the Folio's cover in the middle and apply a light pressure to the back of your Note 8.0. Grasp your Note 8.0's exposed side and lift/pull away from the Folio.

If your Note® 8.0 does not respond to your Folio there may be a simple explanation such as a dead battery or an unsuccessful pairing. Please use the following to help troubleshoot your situation. If none of the following solve your issue, then please contact ZAGG customer service and one of our trained professionals will be happy to assist you.

1. Restart your Note 8.0.
2. Turn your Folio off and back on. You should see the LED status light illuminate briefly, if not, charge your Folio.
3. After charging, turn your Folio on. If the LED status light does not illuminate, and your keyboard doesn't operate correctly, please contact ZAGG's customer support.
4. Forget and re-pair your Folio. On your Note 8.0 select: Settings > General > Bluetooth > On. If you see "ZAGGkeys Folio" listed as an available device, touch the arrow to the right of it and choose to have your Note 8.0 forget the device.
5. Push the PAIR button on your Folio and watch for the LED status light to flash blue.
6. Your Note 8.0 should display "ZAGGkeys Folio" as an available device. Select it.
7. If your Note 8.0 gives you an error message, repeat the pairing process\*.
8. If you still can't get your Folio to pair, it is possible your iPad needs to have its software updated.

*\* If you continually receive the same error message during pairing, or the above steps don't work, please contact ZAGG's customer support for assistance.*

## THE FUNCTION (fn) KEY

The *fn* key operates all key functions listed below. To activate these functions, hold the *fn* key down and press the desired key. For keys with two function symbols, the *fn* key operates the bottom symbol. Holding SHIFT and the *fn* key simultaneously operates the upper symbol.

**caps FN + CAPS** – Activates the CAPS Lock feature. When CAPS Lock is on the LED light on the right will illuminate until CAPS Lock is turned off. To turn CAPS Lock off, simply hold the *fn* key and press CAPS again.

**FN + Microphone Symbol** – Activates your Note 8.0's S Voice feature.

**FN + Battery Symbol** – Indicates remaining battery life

**FN + Backlight On** – Activates your Folio's backlight feature. Pressing this key once will turn on the backlights at their dimmest setting, pressing it twice will brighten the lights, and pressing it three times will brighten them to their brightest setting.

**NOTE:** The backlights will automatically turn off after a couple seconds if not being used. Simply begin typing again to activate them.

**FN + Backlight Off** – Dims the backlights according to their selected brightness until they turn off. For example, if your lights are at their brightest setting, you would press this button once to dim the lights, twice to set them at their dimmest setting, and three times to turn the backlights off.

**FN + Backlight Color Palette** – Press to select your preferred backlight color. Press repeatedly to cycle through available colors.

**NOTE:** The backlight feature must be turned on in order for the palette to work.

## POWERING ON AND OFF

To turn your Folio on, switch the POWER button to the ON position. A red LED light will illuminate briefly while the keyboard powers up. To turn your Folio off, simply switch the POWER button to the OFF position.

## PAIRING YOUR ZAGGkeys™ FOLIO

Pairing your Folio with your Note® 8.0 is easy. It should only need to be paired once, using the following directions. If the connection between your Note 8.0 and Folio is ever lost, simply repeat these steps.

1. On your Note 8.0 select: SETTINGS > GENERAL > BLUETOOTH > ON.
2. Press the PAIR button on your Folio keyboard. A blue LED light in the right of the keyboard will flash until your Folio and Note 8.0 are paired.
3. Your Note 8.0 will display "ZAGGkeys Folio" as an available device. Select this option to complete pairing.

\* If your Note 8.0 doesn't show your ZAGGkeys Folio, select SCAN on the Bluetooth menu to search for it.

Your Folio features a powerful lithium-polymer battery that lasts for up to three months of normal use\* between charges. It comes with a charging cable you can use to charge your keyboard quickly and conveniently. To charge your Folio, simply follow these steps:

1. Plug the micro USB connector into the charging port.
2. Plug the regular USB connector into any USB outlet (including a ZAGGsparq™, your computer, a wall outlet converter, etc.).
3. A red LED light near the charging port will illuminate to indicate the Folio is charging. Wait until this light turns off, indicating a full charge. It usually takes 2-4 hours to completely charge your Folio.
4. Remove the Micro USB connector and enjoy your Folio for up to three months before you need to charge it again.

\* Normal use is approximately 2-3 hours of use per day without the backlit feature. Using the backlit feature will impact battery life and may require more frequent charging.

As mentioned, the Folio features a powerful, rechargeable battery that lasts up to three months between charges\*. To check your Folio's remaining battery power, simply hold down the function (fn) key and press the battery key (also the alt key). The LED indicator will flash one of three ways.

1. Three green flashes indicate 50% or more battery life remaining.
2. Three yellow flashes indicate between 25%-49% battery life remaining.
3. Three red flashes indicate less than 25% battery life remaining. When your Folio reaches critical battery level, the red light will flash once every five minutes.

To help preserve battery life, your Folio will enter sleep mode if left on and not used for several minutes. To awaken your Folio, simply press any key. The Folio's battery has no memory and therefore may be charged whenever you wish. For optimal battery life, we recommend turning your Folio off when it will sit for a prolonged time.

\* This is a safeguard to conserve power until the battery is charged.

## SPECIAL FUNCTION KEYS

Your Folio keyboard has been designed with the following special function keys to give you more control of your Note® 8.0:

\*Note: Not all functions work, or work the same, across all operating systems and/or across all devices within an operating system.

- 🏠 **Home** - Displays your Note 8.0's home screen
- ↶ **Return** - Returns to previous app or program that was last open
- 🔒 **Lock** - Activates and deactivates your Note 8.0's sleep mode
- ✂ **Cut** - Cuts selected text and saves it to your clipboard
- 📄 **Copy** - Copies selected text to your clipboard
- 📄 **Paste** - Pastes clipboard content in your selected field
- ⏮ **Previous Track** - Skips to the previous track on your current playlist
- ⏸ **Play/Pause** - Starts or pauses your current playlist
- ⏭ **Next Track** - Skips to the next track on your current playlist
- 🔇 **Mute** - Mutes your Note 8.0's audio
- 🔊 **Volume Down** - Decreases your Note 8.0's volume
- 🔊 **Volume Up** - Increases your Note 8.0's volume
